4	Session 3 1245 hrs - 1330 hrs	Metaverse Use-Cases -Sh. Nikhil Velpanur, Amazon -Sh. Krishna Tyagi, KPMG
5	Session 4 1330 hrs - 1345 hrs	-Questions and Answers

About the Webinar

The metaverse is a digital reality that combines aspects of social media, online gaming, augmented reality (AR), virtual reality (VR), and cryptocurrencies to allow users to interact virtually. Augmented reality overlays visual elements, sound, and other sensory input onto real-world settings to enhance the user experience.

A "metaverse" is a network of 3D virtual worlds focused on social connection. It is a hypothetical iteration of the Internet as a single, universal, and immersive virtual world that is facilitated by the use of virtual reality (VR) and augmented reality (AR) headsets.

The term "Metaverse" doesn't really refer to any one specific type of technology, but rather a broad shift in how we interact with technology. Convergence of IoT, AI, Blockchain, and other disruptive technology are responsible to create an immersive experience in the Metaverse. The webinar will bring together panel of experts from Industry and Academia for discussion on three aspects of Metaverse: Introduction and opportunity for India; Technologies for Metaverse and Use Cases of Metaverse.
