It gets too overwhelming a process once you set out to start a new business. It may leave you in doubts, anxiety and a ton of other legitimate issues. One of the major areas that businesses need to stay aware about is Intellectual Property Rights. Once the fundamentals of deciding the right business structure are cleared, IPR helps to differentiate your business from the competitors.

Startup ventures should be proactive in developing and protecting their intellectual property for many reasons like improving the valuation of its business, to generate better goodwill, to protect its competitive advantage, to use intellectual property as a marketing edge and MORE...

NTIPRIT, the premier training institute of Department of Telecommunications in its WEBINAR series brings to you this learning event to understand the intricacies of protecting your Intellectual Rights. It will definitely give you insights about the legal provisions and procedures to protect your IDEA and stand out in mass. Our expert panel of speakers will also tell you how the Government of India is promoting the StartUp ecosystem by reaching them to ease out IPR issues and do a hand-holding both financially as well as giving expert-backed solutions under single window.

Lets START right away, register to the event and we will see you there ...
